

### Key Benefits

A powerful 'full' PC in a light weight and easily used form factor

Uses existing IT support and infrastructure, peripherals, applications and governance tools

Supports standard and secure network access technologies for connecting to infrastructure and data

Windows 7 provides advanced features and performance, including touch screen capability

Runs standard applications, including Microsoft Office, Flash, etc.

Flash and Silverlight support ensure existing Rich Internet Applications (RIA) can be used

Large screen makes it easy to read and enter information. On screen keyboard, hand writing input (with text recognition), optional keyboard and voice and video support

USB, HDMI connectivity, plus Wi-Fi

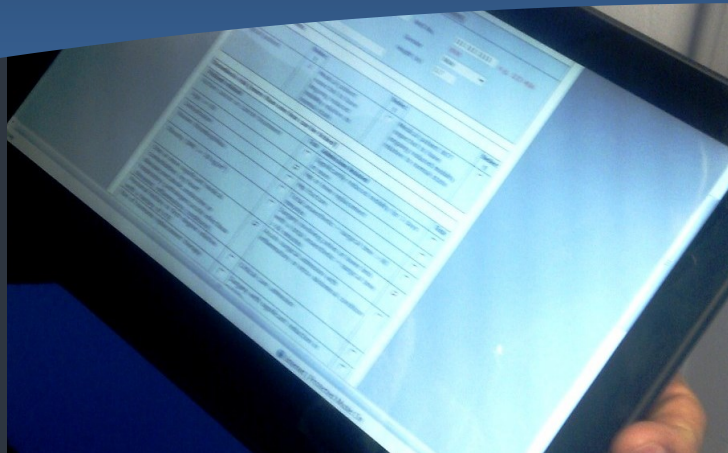

Can be locked to prevent 'unexpected' applications being installed

Very fast resume from standby and long battery life provides 'when I need it' computing

Optional 3G +GPS version for mobile workers

Motion sensor automatically switches between portrait and landscape views to suit the content

Optional docking station, silicone jacket and other accessories provide flexibility for a range of clinical and business environments

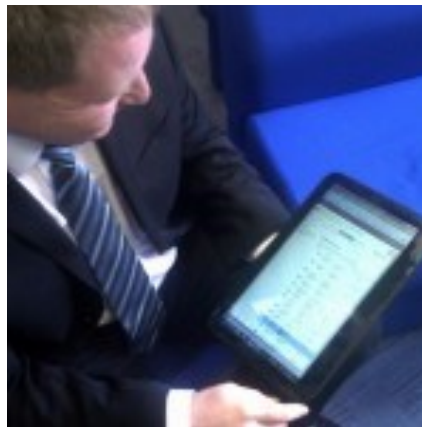

### Factsheet

### Introduction

The new Zoostorm SL8 Slate computer provides the latest in lightweight, portable and "when I need it" computing.

With an 11.6 inch (1366 x 768 resolution) multi-touch screen, Wi-Fi, fast solid state hard drive and a weight below 1 kg it is the ideal tool for staff who need to be mobile and need 'light weight' data input and rapid access to information, such as ward staff, infection control teams, doctors and hands on managers. It also provides a convenient and non-intrusive alternative for executives and public facing staff.

The SL8 squeezes a full (albeit relatively low power) Windows PC into the new tablet or slate form factor, providing a highly portable, non-intrusive device ideally suited to a range of tasks where the ergonomics of traditional computers get in the way.

### A slate for real businesses

The Zoostorm SL8 slate is designed for businesses that have infrastructure and processes in place to support conventional PCs and laptops:

- USB interfaces support smartcard readers and other peripherals
- Standard OS allows existing support and management, security and antivirus, peripherals and standard applications to be used
- Use existing investments in infrastructure and applications

- Flash and Silverlight support, plus standard browsers ensures legacy and rich browser applications run without modification
- Applications can be deployed without using 3rd party 'App Stores'. Ability to lock down the device provides application and data governance

Windows 7 provides excellent multi-touch capabilities, allowing most actions to be a finger press away. A responsive on-screen keyboard allows touch typing, while a capacitive stylus

means users can simply write on the screen and let Windows 7 take care of turning it into text. Use your fingers to flick through pages, pinch to resize and use gestures to control applications via the multi-touch high resolution screen. Turn the SL8 and it switches from portrait to landscape mode automatically, ideal for reading documents or web pages.

The high resolution, high viewing angle screen ensures reading documents and pages is as easy as reading paper, while Wi-Fi connectivity means information is literally at your fingertips via your intranet or internet.

### Standard configuration

The SL8 comes pre-installed with Windows 7 Professional. We do not advise downgrading to Windows XP as this does not support the advanced multi-touch features, very rapid resume mode or sophisticated power management, security and interface features.

We do recommend keeping the installed configuration as light as possible. The 32GB SSD provides fast Windows performance and sufficient capacity for Office Professional Plus; we recommend Office 2010 including both Microsoft

## About Cloud2

Cloud2 specialise in providing SharePoint solutions to the health sector.

We are known for our frank and supportive project style and our ability to deliver successful projects rapidly. Our solutions and services include:

- NHS Intranet, Extranet and Internet
- Document Management and collaboration
- Policies and Procedures
- eForms and workflow
- BI and Performance Management
- Slate computing
- Rich search
- Access database migration
- Programme/Project Mgmt
- GP Referral reduction
- Length of Stay reduction
- SharePoint Support
- N3 Hosting

## What Next?

If you would like any further information on our SharePoint solutions or any other services please get in touch.

OneNote and InfoPath Filler. Internet Explorer 8 is standard and we do not recommend downgrades.

### Applications

Cloud2 have included the SL8 as part of our eForms and Discharge management solutions, for mobile information and application access and for busy executives requiring access to their committee and board papers and actions.

#### Ward scenario - clinical access appliance

We anticipate hospitals equipping each ward with a SL8 and docking station so staff can 'grab' it as they go to the bedside to complete clinical assessments and access patient records via their trust portal or an installed client. The device can be cleaned using alcohol wipes and silicone jackets will be available. USB ports allow standard smart card readers for staff authentication if required.

In this case we recommend keeping it focused on the bedside clinical role, with only a few installed applications so that the slate isn't used as a general purpose computer. When used for electronic forms, Microsoft InfoPath Filler 2010 can be installed and avoids the need for SharePoint Enterprise Client Access Licences. The low cost of the SL8 compared with the alternatives makes them especially attractive for rapid and broad deployment.

#### Mobile Worker scenario

The standard SL8 provides fast Wi-Fi access, however for mobile workers the 3G and GPS enabled version ensures remote access to applications, communications and information when away from their home or office.

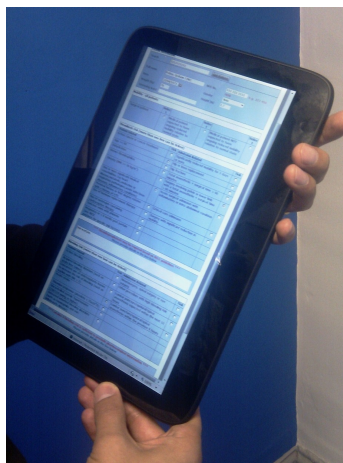

The slate format is far less intrusive than a laptop or PC when people are interacting and allows staff to make notes using the onscreen keyboard or by writing with the stylus into OneNote or directly into applications. Inclusion of offline information via SharePoint Workspace, with its high level of security and ability to synchronise changes back to the central portal ensures staff can work even when the mobile signal is poor.

Enterprise strength security and encryption ensure governance rules around data can be maintained.

#### Board member scenario

Preparation and distribution of board and committee papers consumes large amounts of PA time, incurs substantial paper and copying costs and requires executives to wade through hefty sets of documents.

Providing them with an SL8 slate with OneNote, Outlook and other Microsoft Office applications plus browser access to an intranet meetings solution is cost effective and far more efficient.

The slate provides a great reading experience, while the ability to link documents to hand written or voice notes in OneNote, with the ability to access other related information via links and other tools in an intranet meeting space revolutionises the way executives work and collaborate prior to, during and after their meetings. Cloud2 have a rich meetings solution that includes use of SharePoint Workspace to provide secure offline access to intranet content.

### SL8 or iPad?

Apple's iPad is a truly exciting piece of hardware, but the SL8:

- Works with your existing infrastructure , peripherals, applications and governance tools
- Can use standard and secure network access technologies for connecting to your infrastructure and data
- Runs standard applications, including Microsoft Office, Flash, etc.
- Can be locked to prevent 'unexpected' applications being installed
- Provides a larger screen for easier reading and input

### Specification

**OS:** Microsoft Windows 7 Professional

**Processor:** Intel Atom N450, 1.66GHz

**Memory:** 2Gb 667MHz DDR2

**Storage:** 32GB SSD

**Battery:** Lithium-ion Polymer (7.4V 4800mAh)

**Connectivity:** Wi-Fi (802.11 b/g/n), Bluetooth 2.1, optional 3G/GPS

**Screen:** 11.6" LCD [1366 x 768], capacitive multi-touch HD

**Battery life:** > 3 hours continuous use on Wi-Fi

**Camera:** 1.3Mpixel webcam

**Accelerometer:** 3-way motion sensor

**Audio:** 2 x 1.5W speakers, built-in microphone

**Interfaces:** Mini-HDMI, 2 x USB 2.0, headphone port, MS/SD /MMC card slot, SIM card slot (3G model only), 26-pin dock connector

**Dimensions:** 295 x 195 x 14 mm

**Weight:** < 990g

**Warranty:** 12 Month collect and return

**Accessories:** Docking station (with Ethernet card), carry case, silicone jacket, keyboard and mouse, spare stylus
